

### Recommended Control Box Positioning

Site the control box preferably to an upright surface, in an accessible service void, adjacent to or below the display unit (minimum clearance below underside of display unit = 200mm).

### Incorrect Control Box Positioning

The control box must not be located

- 1) directly to the underside of the display unit,
- 2) above a hot cupboard or,
- 3) where ambient temperature is above 40°C,
- 4) where likely to allow ingress of water i.e. wet floor areas.

### Display Performance Considerations

The position of the display may effect its performance: Site the display in a position away from direct draughts and also indirect draughts created by air conditioning. In known draught conditions or if in doubt, performance can be enhanced by insallation of the assisted service glass option - KAS2
