Non-contractual documents. The specifications given are subject to change with a view to improvement.

GENERAL SPECIFICATIONS:

- Anodised aluminium uprights with jacks with no exposed thread.
- **Shelves** made up of 2 anodised aluminium side members and a combination of shelf plates.
- **Shelves** made of high density polypropylene with tab for marking.

ASSEMBLY:

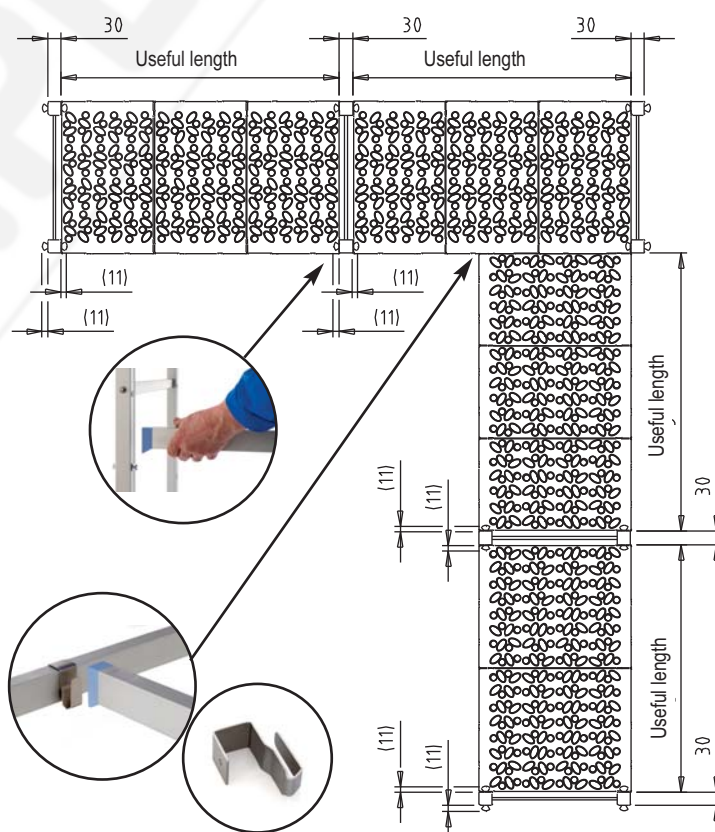

- By insertion using no tools.

SAFETY:

- Maximum load: 200 kg evenly distributed per level for shelves.

- Also available: racking on wheels (height: 1750 mm, depth: 500 or 560 mm).

RACKING WITH POLYPROPYLENE SHELVES

The combination of the 18 models of racks and 30 models of shelves determines the characteristics of the units, assembled in line or complementary in corner formation.

The coding of these units is made up of a prefix of 3 letters followed by 4 numbers of the overall length in mm (eg: PLE 1594 for complete racking assembled in line, 1750 mm high, 500 mm deep, with 4 levels, overall length: 1594 mm).

Prefixes for complete units assembled in line
