- * Adults Or Children

Sanitising Post & Manual Dispenser With Signage (Alcohol Gel).

Public Health England advise that using a sanitising gel that has an alcohol content of 60% and above, is effective at killing corona virus. The CED alcohol gel sanitising post & manual dispenser is specially designed to help maintain a hygienic environment and allow you to combine safety and practicality at low cost.

Easy To Use. Just apply light pressure with the forearm to dispense 1-2ml of the sanitising gel. The 500 ml dispenser suits alcohol gel $\geq 60\%$ & is simple to refill. It just lifts out of the post to enable unscrewing of the alcohol gel storage bottle. The sanitising post is available as either a 1058mm (adult) or 858mm (child) high model and features a large dispensing capacity of approximately 250-300 doses. The slotted window in the post provides easy monitoring of gel level.

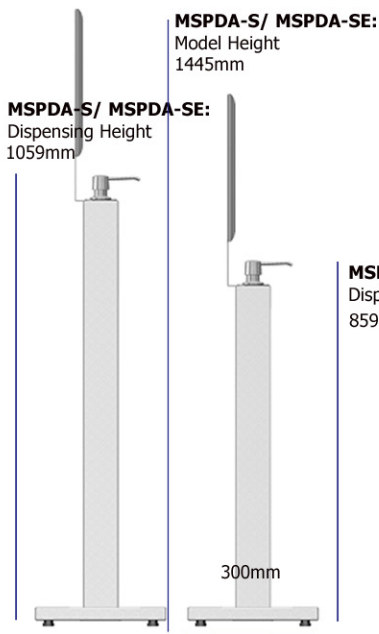

Economic & Durable. This free-standing steel post and sanitising gel dispenser can be placed in several locations for efficiency and security, to encourage PPB (personal protective behaviour). The spring loaded dispenser has been tested for a lifetime delivery of 50,000 doses too!

Practical. You can easily install or relocate the sanitising post and heavy duty manual dispenser in many locations as there is no electrical connection.

Fitted With A4 Sign Holder. Both heights of the sanitising post & manual dispenser can be purchased with a waterproof A4 sign holder mounted at eye level. The portrait orientation sign holder is an ideal communication point for advising on social distancing, customer flow or temporary access restrictions.

External Use. A 304 gd. s/steel option of this particular model allows the unit to be used externally at entrance locations.

Suitable For Adults & Children. The sanitising post is ideal for helping control hygiene in schools too. The children's version makes it easy to instill the importance of hygiene in collective environments. Designed with a usable 859mm height for children, the model can be positioned in a host of strategic locations like dining halls, classrooms and wherever children congregate.
