

806 286 : Mobile Sanitising Gel Dispenser (*Pedal Operated*).

Disinfects Hands Without Contact Either Indoor Or Outdoor.

**LARGE
CAPACITY:
2 x 5 LITERS
(2 x 2500 DOSES)**

NEW

Features

The new Tournus versatile mobile sanitising gel dispenser is easy to use and operate. The pull out handle, stainless steel body and wheels allow the dispenser to be used either indoors or outdoors. With both storage and holding space for 2x 5 litre alcohol gel or liquid soap tubs, this durable sanitising solution is ideal for high-traffic locations, inside or outside shops or businesses. No electric supply or batteries are required, as it works mechanically without any contact with the device.

Easy To Use

Pressing the pedal triggers the dispensing of a dose of sanitising solution. The foot control prevents any hand contact with the dispenser.

The dispenser has rear storage compartments for locating two 5 litre gel tubs. **The dispenser accepts all standard 5lt. alcohol gel/ sanitising liquid containers** (*not supplied*). Simply unscrew the container lid and insert the feed tube that is already connected to the pump dispenser. It's ready to use!

The dispenser has rear viewing windows to easily monitor the gel level within a clear plastic sanitising liquid container.

Mobile

A retractable top mounted handle and 2 large heavy duty wheels make it easy to move inside overnight or transfer to a new location.

Efficient

The two internal storage compartments provide capacity for up to 5000 sanitising gel dispensing doses before it's time to replace the containers! With one container connected to the pump dispenser and another waiting in reserve, you can save time and space storing and replenishing the mobile sanitising gel dispenser.

Hygienic

The smooth stainless steel surface both resists bacteria from entering the unit and provides an easily cleaned surface. **Because of the material used, it is suitable for both indoor and outdoor use.** The drip tray under the dispenser nozzle is removable for cleaning.

Anti-Theft

The rear wheel axle or the top mounted handle can be utilised to fasten a chain or cable around. The rear lift off panel that houses the containers can also accept the fitting of a padlock if required (*chain/ cable or padlocks are not supplied*).
