MANAGING WASTE IN THE DINING AREA

SORTING

CREATE GOOD HABITS !

Waste management education in the dining area is increasingly frequent, and can start with the very youngest of school children. In addition to it's educational aspect, segregating waste food, cutlery and crockery improves efficiency in the kitchen cleaning operations, allowing washing-up staff to gain time during dish washing etc.

Sorting Units : A Dining Hall Waste Management System For Either Adults Or Children.

Choose from over 20 shades of laminate finishes to front and side panels, to suit localised colour schemes. Each unit features 3 x 1/3Gn cutlery containers, 2 x waste food chutes and a recessed glass dish-wash basket storage area, formed as a set down in the top. The overall unit depth is 1015 mm (including the tray rest).

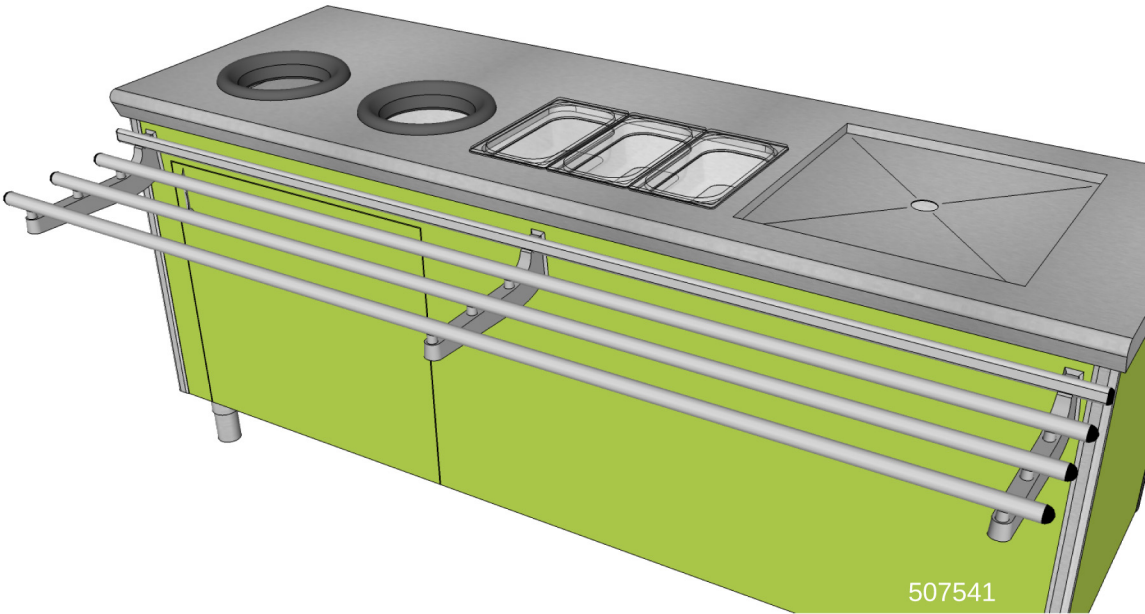

Two heights are available, a 720 mm high childrens unit and a 900 mm high unit for adults.

These ergonomic units are designed to be placed in the dining area against a wall. They feature tray rest to commence waste sorting operations, allowing for food waste disposal and storing of glasses, cutlery and plates, before being taken up by the washing-up staff. A hinged door under the tray rest, provides access to waste bags for disposal.

Description	Dimensions L x D x H (mm)	Model Code
Sorting Unit (Child Height)	2100 x 1015 x 720	507 540
Sorting Unit (Adult Height)	2100 x 1015 x 900	507 541
